

## Subjects Wanted

Published November 10th, 2024

The Canadian Academy of Audiology

### McGill University Research Study

If you know of anyone who might be interested in participating, please feel free to share this information with them.

**Are you d/Deaf, hard-of-hearing or hearing person related to the Deaf community (child of deaf adults, interpreter, family member of a d/Deaf person, etc.)?**

**Are you interested in music?**

**Then ...**

**We would like to hear from you about your music experiences and the use of music instruments and devices. You are invited to take this survey whether or not you personally use music instruments and devices, and no matter what style of music you like.**

My name is Erivan Duarte, PhD student at McGill University. I am conducting research on the musical habits and practices of people related to the Deaf community, and the strategies they use to access and make music. The research is developed under supervision of professors Isabelle Cossette and Marcelo M. Wanderley. As a first step we would like to understand the ways you access and make music. By participating in this research, you will help us understand how to implement music technology that benefits d/Deaf and hard-of-hearing people.

The survey may take between 20 and 30 minutes to complete. While it is accessible across all devices, you may find it most convenient to complete on a computer or tablet equipped with a keyboard.

Here is the online survey link: <https://surveys.mcgill.ca/ls3/229918?lang=en>

### UBC University Research Study

# TAKE PART IN OUR SURVEY TO CONTRIBUTE TO THE FUTURE OF AUDIOLOGY

## WHY ARE WE DOING THIS STUDY?

To collect valuable insights into the evidence-based practices of audiologists across Canada.

## WHO CAN TAKE PART?

We are looking for registered practicing audiologists across Canada to partake in our study.

## WHAT WOULD YOU NEED TO DO?

Please click the link or scan the QR code below to get started. This task will take you approximately 15 minutes. The survey is anonymous and participation can be withdrawn at any time prior to submission. Data cannot be withdrawn after submission due to anonymizing of data.

**DO YOU HAVE  
15 MINUTES?**

Primary Investigator: Navid Shahnaz, PhD
